PERFORMANCE KPIs

KPIs · Monthly Targets · Measurement Methods

Prepared for the Carbinox Leadership Team

Miami, Florida

How To Use This Document

This document defines the core performance KPIs, monthly targets, and measurement methods for every filled position in the Carbinox org chart. Each role gets between three and five numbers — no more. The point isn't to track everything; it's to track the few things that, if managed well, mean the role is being done well.

Targets are reviewed monthly. If a number slips, the conversation starts there. If a number is consistently green, that person is winning — promote, scale, or replicate them.

The 'How to Measure' column tells the team exactly where to pull the data from and how the number is calculated. No ambiguity. If two people would calculate the same KPI differently, the KPI is broken.

Open seats (COO, CMO, CRO, Head of Creative, Head of Retention, Head of Brand, Head of Website Growth) are not included. KPIs for those roles will be defined when filled.

MARKETING & ADVERTISING

Head of Advertising | *Damian Perez*

#	KPI	Target	How to Measure
1	Blended ROAS	2.28x	Total revenue ÷ total ad spend across all platforms. Pull from Shopify (revenue) and ad platforms / Triple Whale (spend), reviewed weekly.
2	NC ROAS	1.9x	New customer revenue ÷ total ad spend. Pull new customer revenue from Shopify (First-time customer report) or Triple Whale / Northbeam attribution.
3	CAC	\$65	Total ad spend ÷ # of new customers acquired. Pull new customers from Shopify First-time vs. Returning report.
4	Winning Creative Rate	15%	# of creatives that beat control ÷ total creatives tested. Tracked in the creative testing log (Google Sheet / Motion / Atria) updated by Damian weekly.
5	Spend Pacing	±10% of forecast	Actual monthly spend vs. forecasted monthly spend. Pull actual from ad platforms; forecast from monthly media plan.

Media Buyers — Standard KPI Set

All media buyers share the same 3 KPIs. Only the targets differ by platform.

Meta Media Buyer | *Simona Saule / Kristaps Krauklis*

#	KPI	Target	How to Measure
1	Platform ROAS	1.66x	Meta revenue ÷ Meta spend. Pulled from Meta Ads Manager + Shopify / Triple Whale attribution.
2	CAC	\$65	Meta spend ÷ new customers attributed to Meta. Pulled from Triple Whale / Northbeam or Shopify UTM tagging.
3	Spend Pacing	±10% of forecast	Actual Meta spend vs. forecasted Meta spend. Pulled from Meta Ads Manager weekly.

Google Media Buyer | *Ivana Vitali*

#	KPI	Target	How to Measure
1	Platform ROAS	3.0x	Google revenue ÷ Google spend. Pulled from Google Ads + Shopify / Triple Whale attribution.
2	CAC	\$50	Google spend ÷ new customers attributed to Google. Pulled from Triple Whale / Northbeam.
3	Spend Pacing	±10% of forecast	Actual Google spend vs. forecasted spend. Pulled from Google Ads weekly.

Snap Media Buyer | *Simona Saule / Kristaps Krauklis*

#	KPI	Target	How to Measure
1	Platform ROAS	1.80x	Snap revenue ÷ Snap spend. Pulled from Snap Ads Manager + attribution platform.
2	CAC	\$75	Snap spend ÷ new customers attributed to Snap. Pulled from Triple Whale / Northbeam.
3	Spend Pacing	±10% of forecast	Actual Snap spend vs. forecasted spend. Pulled from Snap Ads Manager weekly.

TikTok Media Buyer | *Damian Perez*

#	KPI	Target	How to Measure
1	Platform ROAS	1.5x	TikTok revenue ÷ TikTok spend. Pulled from TikTok Ads Manager + attribution platform.
2	CAC	\$70	TikTok spend ÷ new customers attributed to TikTok. Pulled from Triple Whale / Northbeam.
3	Spend Pacing	±10% of forecast	Actual TikTok spend vs. forecasted spend. Pulled from TikTok Ads Manager weekly.

AppLovin Media Buyer | *Damian Perez*

#	KPI	Target	How to Measure
1	Platform ROAS	1.5x	AppLovin revenue ÷ AppLovin spend. Pulled from AppLovin dashboard + attribution platform.

#	KPI	Target	How to Measure
2	CAC	\$80	AppLovin spend ÷ new customers attributed. Pulled from Triple Whale / Northbeam.
3	Spend Pacing	±10% of forecast	Actual AppLovin spend vs. forecasted spend. Pulled from AppLovin dashboard weekly.

Reddit Media Buyer | *Damian Perez*

#	KPI	Target	How to Measure
1	Platform ROAS	2.0x	Reddit revenue ÷ Reddit spend. Pulled from Reddit Ads + attribution platform.
2	CAC	\$75	Reddit spend ÷ new customers attributed to Reddit. Pulled from Triple Whale / Northbeam.
3	Spend Pacing	±10% of forecast	Actual Reddit spend vs. forecasted spend. Pulled from Reddit Ads weekly.

Creative Strategist | *Oli Cimet · Malu Celestino · Maria Paula Dominguez · Dante Vilar*

Each creative concept must be tagged to one strategist (in naming convention or testing log) so KPIs roll up to the individual.

#	KPI	Target	How to Measure
1	% of Winning Images	15%	# of their static creatives that beat control ÷ total static creatives tested. Tracked in creative testing log.
2	% of Winning Videos	15%	# of their video creatives that beat control ÷ total video creatives tested. Tracked in creative testing log.
3	Average Hook Rate	35%	Average 3-second view rate across their creatives. Pulled from Meta Ads Manager (3-sec video plays ÷ impressions).
4	CTR	1%	Total clicks ÷ total impressions across their creatives. Pulled from Meta / TikTok Ads Manager.
5	Spend Concentration	25% (±5%)	Total ad spend on their creatives ÷ total ad spend (across all 4 strategists). Each strategist should hold ~25%.

Video Editor | *Dante Vilar · Pedro Raze · Sami Mughal · Paul R.*

#	KPI	Target	How to Measure
1	On-Time Delivery Rate	95%	# of videos delivered by deadline ÷ total videos assigned. Tracked in project management tool (Monday / ClickUp / Notion).
2	Revision Rate	Under 20%	# of videos requiring rework after first delivery ÷ total videos delivered. Tracked by the strategist or PM in the project tool.
3	Hold Rate	5%	% of viewers still watching at the defined hold-rate timestamp. Pulled from Meta Ads Manager video metrics.

Graphic Designer | *Winder Buznego*

#	KPI	Target	How to Measure
1	On-Time Delivery Rate	95%	# of designs delivered by deadline ÷ total designs assigned. Tracked in project management tool.
2	Revision Rate	Under 20%	# of designs requiring rework after first delivery ÷ total designs delivered. Tracked

#	KPI	Target	How to Measure
			by the strategist or PM.
3	Average CTR on Their Designs	1%	Total clicks ÷ total impressions across his designs. Pulled from Meta / TikTok Ads Manager, filtered to his creative IDs.

Content Manager | *Jesus de Windt*

#	KPI	Target	How to Measure
1	# of YouTube Reviews Sourced	10/month minimum	# of new YouTube creator review videos sourced and uploaded to the content library per month. Tracked in the content library log.
2	# of AI Pieces Uploaded as Ads	64/month	# of AI-generated creative pieces uploaded to the ad library and tested per month. Tracked in the creative testing log.

TikTok Shop Specialist | *Jesus de Windt / Maria Paula Dominguez*

These KPIs are specific to TikTok Shop and run alongside any Marketplaces KPIs that may apply.

#	KPI	Target	How to Measure
1	New Affiliate Retainer Contracts	25/month minimum	# of new affiliate creators signed to a retainer contract per month. Tracked in the affiliate CRM / spreadsheet.
2	# of New Videos Posted by Affiliates	500/month minimum	Total # of TikTok videos posted by Carbinox affiliates per month. Pulled from TikTok Shop affiliate dashboard.
3	Winning Rate on Meta (Repurposed Content)	15% minimum	# of TikTok affiliate videos repurposed to Meta that beat control ÷ total repurposed creatives tested. Tracked in creative testing log.

RETENTION

Email & SMS Specialist | *Samra Zuga*

#	KPI	Target	How to Measure
1	Retention Channel Revenue %	25%	Email + SMS revenue ÷ total store revenue. Pulled from Klaviyo + Postscript revenue reports vs. Shopify total revenue.
2	Flow vs. Campaign Revenue Split	60% flow / 40% campaign (±5%)	Flow revenue and campaign revenue, each as % of total email + SMS revenue. Pulled from Klaviyo + Postscript dashboards.
3	List Growth Rate	5% net/month	(New subscribers – unsubscribes – bounces) ÷ list size at start of month. Pulled from Klaviyo + Postscript subscriber reports.
4	Open Rate / CTR	50% open / 1% CTR minimum	Open rate (email): opens ÷ delivered. CTR (email + SMS): clicks ÷ delivered. Averaged across all sends in the month, pulled from Klaviyo + Postscript.
5	Unsubscribe Rate	Below 0.3% per send	Unsubscribes ÷ delivered, averaged across all campaigns in the month. Pulled from Klaviyo + Postscript.

CUSTOMER EXPERIENCE

Head of CX Success | *Doralee Clemente*

#	KPI	Target	How to Measure
1	CSAT	90%+	Average rating from post-ticket satisfaction surveys. Pulled from Gorgias / Zendesk / Helpscout CSAT reports.
2	Average First Response Time	Under 4 hours	Time elapsed from ticket creation to first agent reply, averaged across all tickets in the month. Pulled from helpdesk reports.
3	Tickets per 100 Orders	Under 25	$(\text{Total tickets} \div \text{total orders}) \times 100$. Pulled from helpdesk + Shopify.
4	Save Rate	30%	# of refund/return requests retained with an offer $\div$ total refund/return requests received. Tracked in helpdesk tags or a dedicated save-rate spreadsheet.
5	Chargeback Rate	Under 0.5%	# of chargebacks $\div$ total orders in the month. Pulled from Shopify Payments / Stripe / Shopify Pay dispute report.

CX Representative | *Anthony Burac · Justine Formacion · Juan Urena · Felipe Osorio*

#	KPI	Target	How to Measure
1	Tickets Resolved per Day	50/day	# of tickets closed per shift, averaged across the month. Pulled from helpdesk per-agent reports.
2	Average Response Time	Under 4 hours	Average time from ticket assignment to first reply, per rep. Pulled from helpdesk per-agent reports.
3	CSAT (per rep)	90%+	Average rating on tickets they personally handled. Pulled from helpdesk per-agent CSAT report.
4	Save Rate (per rep)	30%	# of refund/return requests they retained $\div$ total they received. Tracked in helpdesk tags or save-rate spreadsheet, filtered by agent.
5	First-Touch Resolution Rate	70%	# of their tickets solved in one reply (no back-and-forth) $\div$ total tickets they handled. Pulled from helpdesk per-agent reports.

Head of Team Success | *Thaylu Rojas*

Thaylu is also acting CXO and is covering Team Success in parallel.

#	KPI	Target	How to Measure
1	% Completion of Monthly Activities	95%	# of team members who completed all assigned monthly activities ÷ total team members. Tracked in the activities tracker (Notion / Sheet).
2	% Engagement per Slack Post	50%	Average % of team that reacts, replies, or views per leadership Slack post. Tracked manually or via Slack analytics.
3	Employee Retention Rate	100%	# of team members retained at month-end ÷ # at month-start. Pulled from HR records.

REVENUE

Head of Website | *Damian Perez*

#	KPI	Target	How to Measure
1	Conversion Rate (CVR)	1.5%+	Orders ÷ sessions, tracked separately for mobile and desktop. Pulled from Shopify / GA4.
2	Average Order Value (AOV)	\$130+	Total revenue ÷ total orders. Pulled from Shopify.
3	Revenue per Visitor (RPV)	\$2.50+	Total revenue ÷ total sessions (CVR × AOV). Pulled from Shopify / GA4.
4	Page Speed	85%+	PageSpeed Insights mobile score. Pulled from PageSpeed Insights or Shopify Online Store Speed report.
5	A/B Test Win Rate	60%+	# of A/B tests that beat control with statistical significance ÷ total tests run. Tracked in the testing tool (Convert / GLOW / Replo).

Head of Marketplaces | *Gyorgy Vagovits*

#	KPI	Target	How to Measure
1	Marketplace Revenue Growth	+30% YoY	Current month total marketplace revenue vs. same month previous year. Pulled from Amazon Seller Central, Walmart Seller Center, TikTok Shop, Best Buy reports.
2	Amazon ROAS	4.0x	Amazon ad revenue ÷ Amazon ad spend. Pulled from Amazon Ads / Helium 10 / Sellerboard. (TACoS roughly 10–12% as a diagnostic.)
3	Conversion Rate by Marketplace	10%+	Listing visits ÷ orders, per marketplace. Pulled from Amazon Brand Analytics, Walmart Seller Center, TikTok Shop dashboard.
4	Profit Margin per Marketplace	25%+	Net margin per marketplace after fees, ads, returns, and shipping. Calculated from P&L by channel (Sellerboard / spreadsheet).

FINANCE & OPERATIONS

CFO (Fractional) | *Jaime Trujillo*

#	KPI	Target	How to Measure
1	Gross Profit Margin %	60%+	(Revenue – COGS) ÷ Revenue. Pulled from QuickBooks / Xero / monthly P&L.
2	Net Profit Margin %	15%+	Net profit ÷ Revenue. Pulled from monthly P&L after all expenses.
3	Cash Runway	6+ months	Cash on hand ÷ average monthly burn rate (operating expenses). Pulled from bank statements + P&L.
4	Inventory Turnover	4x annually	COGS ÷ average inventory value. Calculated from P&L (COGS) and inventory reports (Sortly / Shopify).
5	EBITDA Margin	10%+	EBITDA ÷ Revenue. Earnings before interest, tax, depreciation, amortization. Pulled from monthly P&L.

Head of Logistics | *Evelyn Marin*

#	KPI	Target	How to Measure
1	Order Accuracy Rate	95%+	(Orders shipped correctly ÷ total orders shipped) × 100. Tracked via post-ship audits, customer complaints, and helpdesk error tags.
2	On-Time Shipping Rate	95%+	(Orders shipped within SLA ÷ total orders shipped) × 100. Compare order created timestamp vs. fulfilled timestamp in Shopify / ShipStation.
3	Inventory Count Accuracy	95%+	Physical count vs. system count, performed via cycle counts. Discrepancies tracked in Sortly / Shopify inventory.

Head of Supply Chain | *Thaylu Rojas*

Thaylu is also acting CXO and is covering Supply Chain in parallel.

#	KPI	Target	How to Measure
1	In-Stock Rate	95%+	% of SKUs in stock across all sales channels (Shopify, Amazon, Walmart, TikTok Shop). Pulled from Sortly / Shopify inventory reports.
2	PO Tracking Accuracy	100%	# of POs placed that are correctly

#	KPI	Target	How to Measure
			registered in Slack, Sortly, AND Shopify ÷ total POs placed. Audited weekly via cross-check.
3	Days of Inventory on Hand	60–90 days	Current inventory ÷ average daily sales rate. Pulled from Sortly / Shopify inventory + sales velocity.

FINAL NOTE

These KPIs are the minimum scoreboard. They tell us if the business is healthy, where the bottlenecks are, and who's winning. Targets are reviewed monthly. Measurement methods are non-negotiable — if the team isn't pulling the number from the source listed here, the number doesn't count.

Open seats (COO, CMO, CRO, Head of Creative, Head of Retention, Head of Brand, Head of Website Growth) will inherit and expand on the KPIs of the heads currently rolling up to them. Once filled, this document gets updated.
