

CARBINOX

CARBINOX

OUR CONCEPT IS INSPIRED ON ONE WORD: DURABILITY.

Our essence is based on providing high quality and strong products for hard-workers who want to stay connected.

To communicate that, our visual identity draws from textures, shapes and graphic elements that, together, integrate both strength and boldness without looking aggressive.

ABOUT THIS TOOLKIT

This manual sets out all the guidelines and gather the necessary resources to design various applications of the brand.

INTERACTIVE BRANDBOOK

Use the navigation bar (end left) to jump to the desired section.

These type of [Buttons](#) lead to the source files and editables referred to in the section.

LOGO CHEATSHEET

WE USE THE LOGO IN SUCH A WAY THAT IT IS INSTANTLY RECOGNIZABLE AND DOMINATES ANY DESIGN SPACE.

CARBINOX

Logotype

Carbinox is a strong and bold brand, and its logotype communicates that. Use it in applications to identify the brand: shirts, packaging and stationary.

Isotype

The X becomes a symbol for the brand, use it as a graphic element, watermark or in reduced spaces.

SAFE SPACE

We want the logo to be legible and visible, so, ideally, it should have proper distance between it and other elements in our design.

Use the X of the logotype at the same scale to define the minimum safe area.

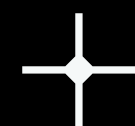

USAGE

Use only the logo provided in the editable. Any use or application that is not stipulated in this manual considered as incorrect use of the logo. Its distortion or modification (in proportions, elements or colors out of brand) without approval are prohibited.

CARBINOX

WE WORK HARD

OUR MAIN GOAL IS TO MAKE PEOPLE FEEL REPRESENTED WITH A BRAND THAT
CARES ABOUT THEM THROUGH DURABLE PRODUCTS, STRONGER THAN OTHERS.

COLOR PALETTE PROPORTION

WE ARE A BLACK AND WHITE BRAND WITH COLOR ACCENTS.

Our color accents allow us to differentiate our products and help the consumer navigate through our visual identity. Remember that their excessive usage can result overwhelming, which is why we tend to use this formula:

Black + White + Accent 1 (optional) + Accent 2 (optional).

Neutral colors

Accent colors

BRAND COLOR PALETTE

Primary (bigger proportion on the brand)

Accents 01 (preferred accent colors)

Accents 02 (accent colors to differentiate products)

INCORRECT USAGE

Don't use colors that are not part of the palette.

Don't use these color combos, they visually vibrate.

Don't use gradients, they're not part of the brand.

MORGANITE

FOR TITLES AND
IMPACT KEYWORDS

Always use it in all-caps. We prefer Black and Bold weights over the rest. If the typeface is at a reduced scale, we recommend to increase the tracking to 10pts to ensure legibility.

KONSTANT GROTESK

For second-level headings, we prefer to use it in all-caps as well. This is a perfect companion for Morganite without redirecting attention from it.

ANDROMECHA

Use this font exclusively for numbers, especially at large scale. This works more as a graphic element in layouts.

SF Pro

This font family is ideal for small-scaled texts and large paragraphs.

PATTERNS

IT ALL COMES FROM THE X.

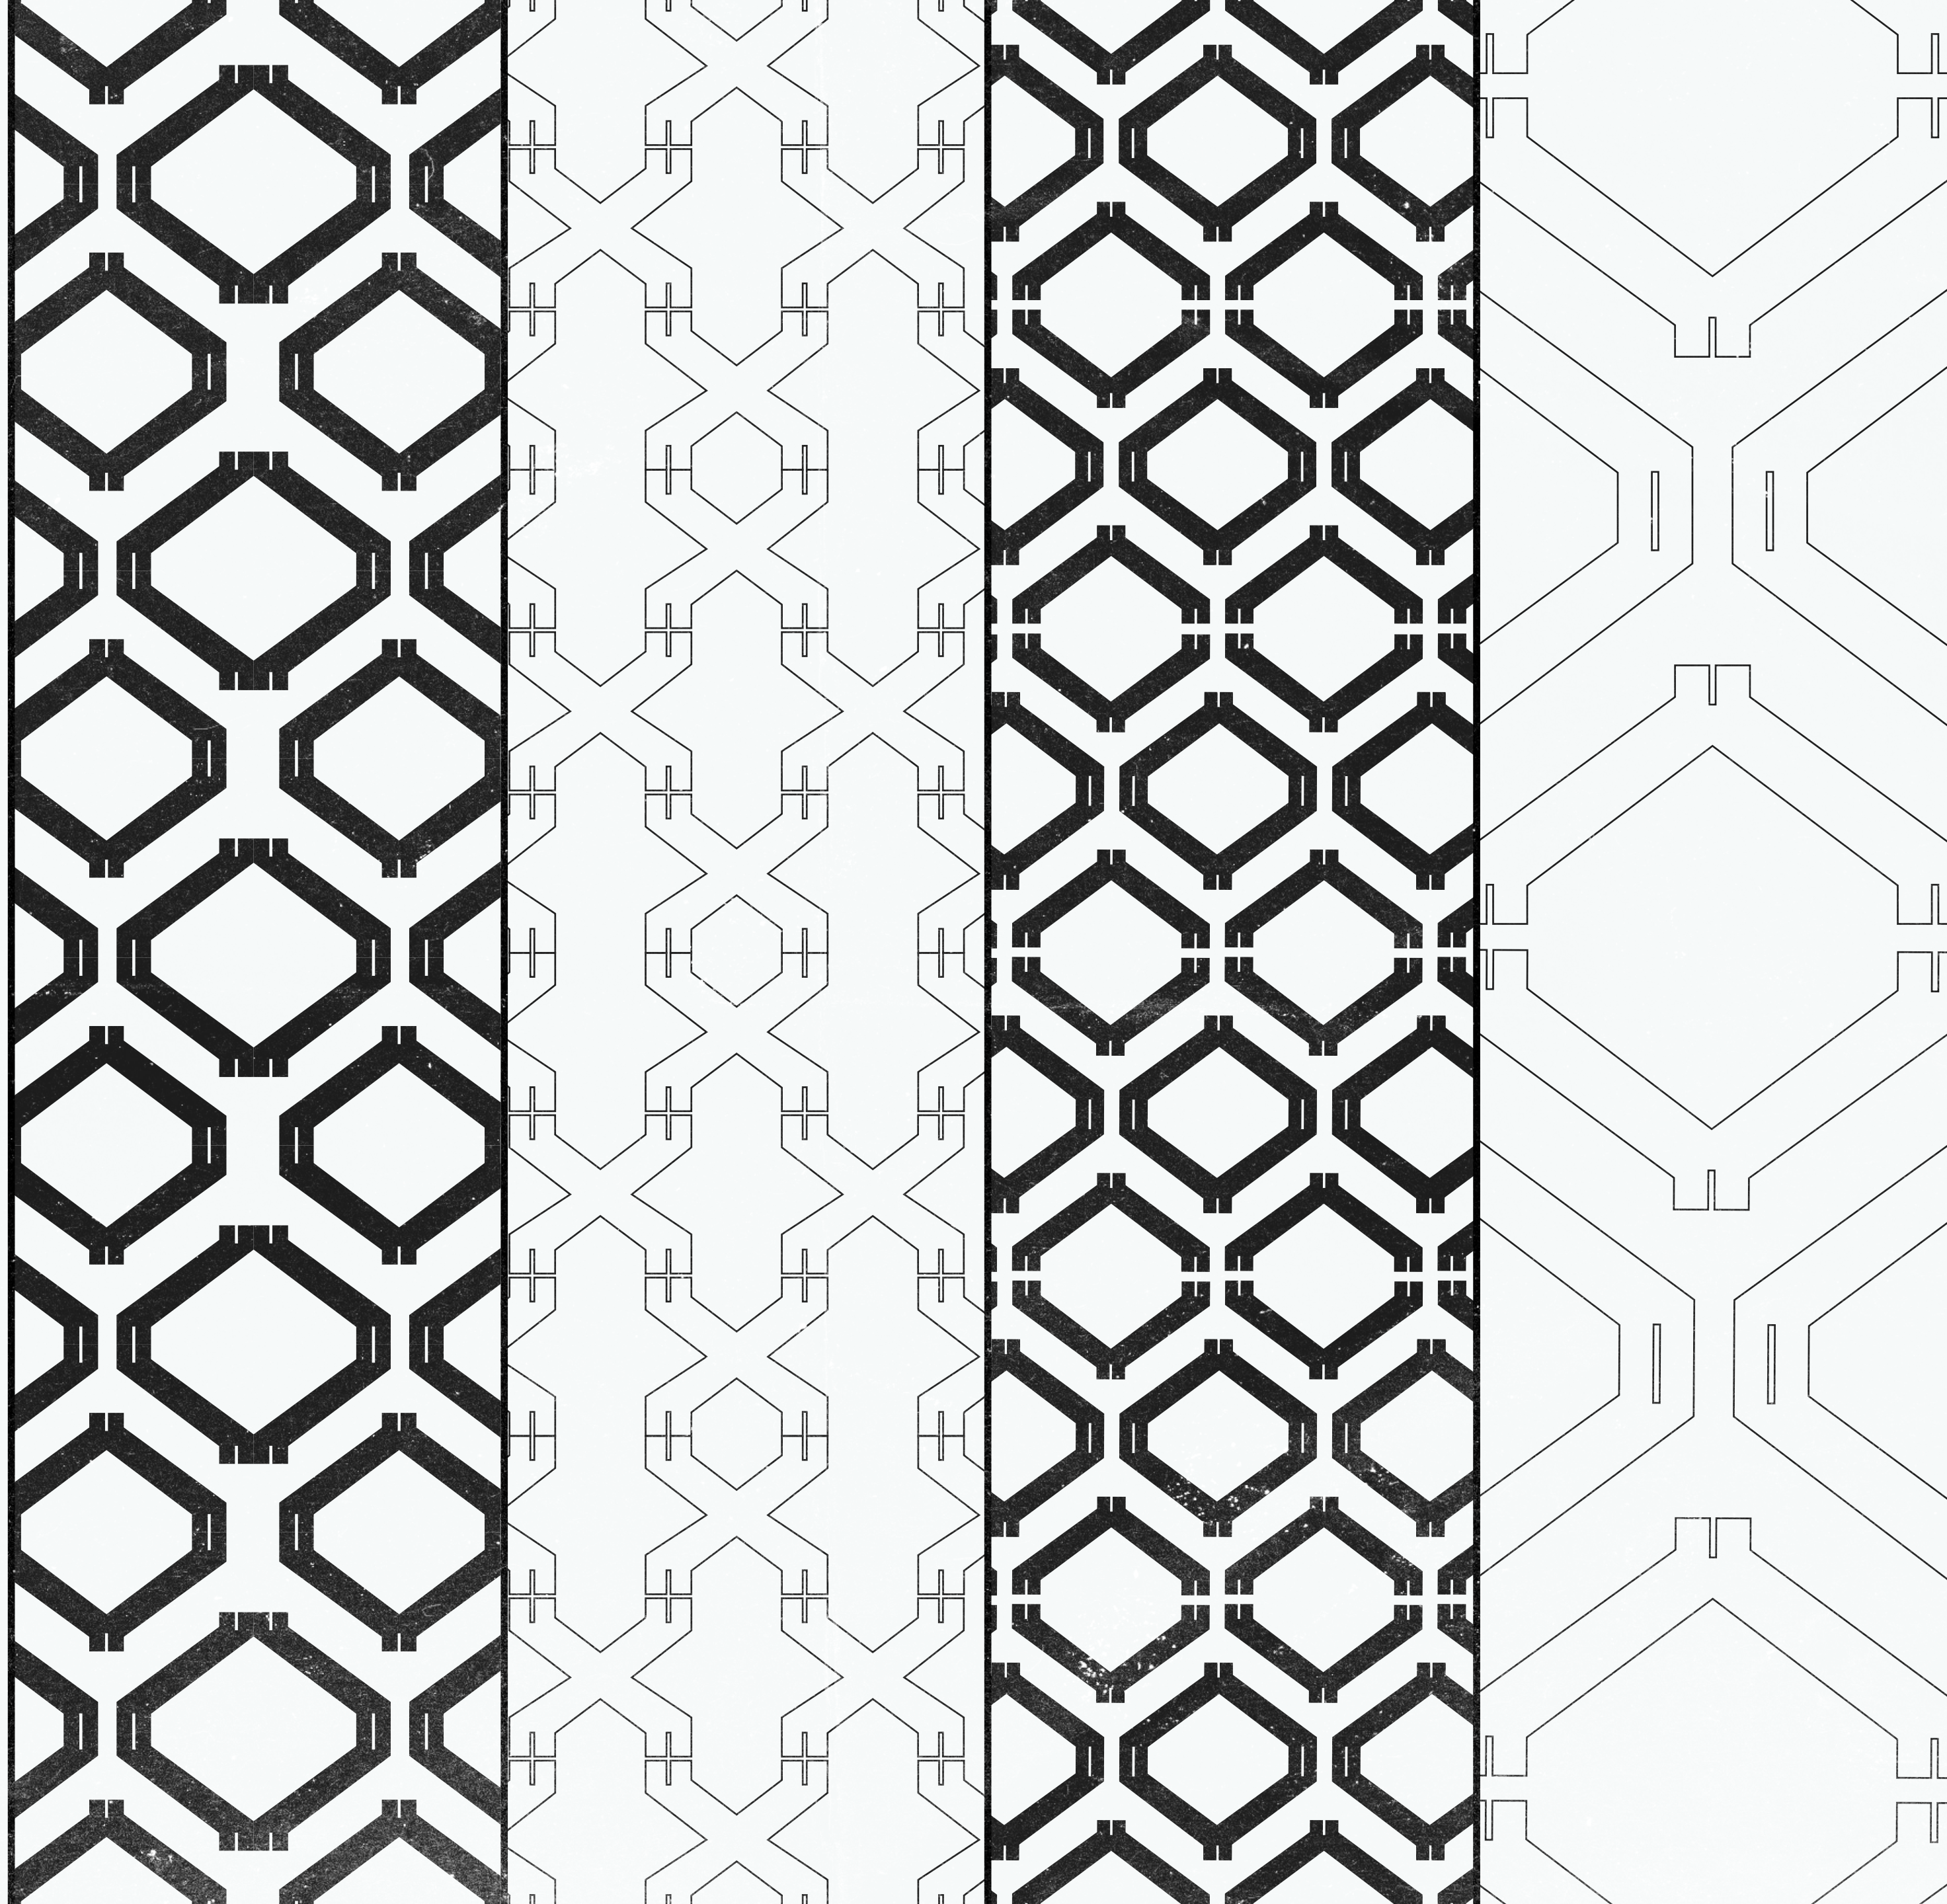

The starting point for all patterns is Carbinox's "X". Thanks to its interesting shape anatomy, we're able to combine it in different ways to achieve distinct repetitions.

HOW TO USE THEM

They're ideal for backgrounds. In this brandbook you'll find various instances of it.

They don't need to occupy the whole background to be interesting. To achieve your desired result, **switch between stroke and filled; play with scale, opacity and blending modes**. Feel free to experiment with these!

[Patterns](#) ↗

CARBINOX

WE WORK WITH TEXTURES

WE USE TEXTURES TO BRING THE PHYSICAL EXPERIENCE INTO THE DIGITAL MEDIA.
WHETHER IT'D BE PATTERNS, NOISE, GRAIN OR OTHERS, WE MIX BOTH WORLDS
TO CONVEY THE DUAL NATURE OF OUR PRODUCT.

SHAPE SYSTEM

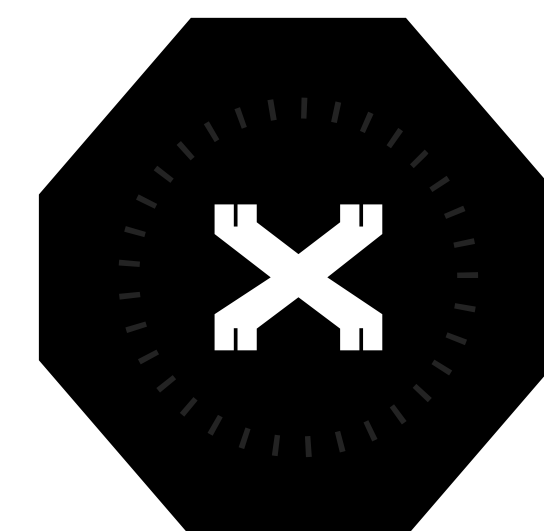

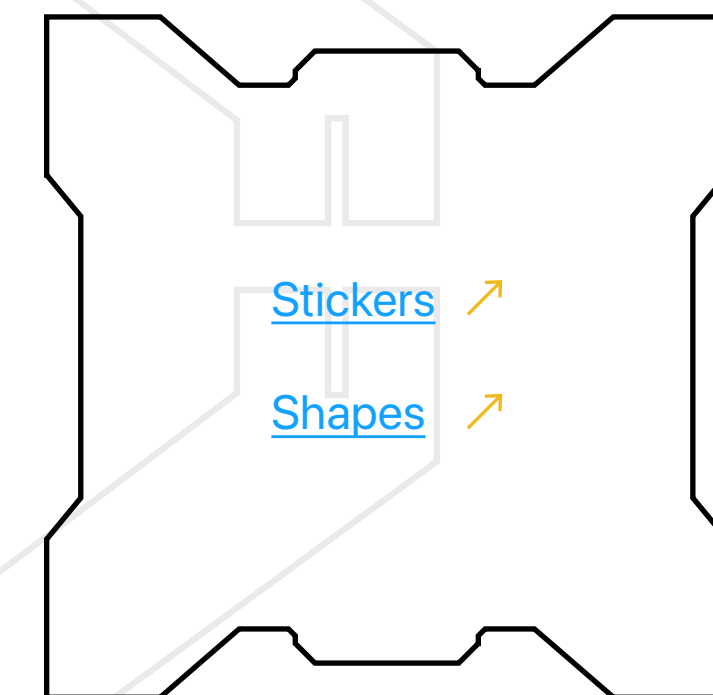

GEOMETRIC CONSTRUCTION & DECONSTRUCTION

Carbinox's shapes come from squares. Play with its vertex to create hard edges, new diagonals and sides. The easiest way to do them is by deconstructing it with other squares.

HOW TO USE THEM

As stickers: combine the X, other shapes and typography to create stickers for digital and print uses.

Zoomed in: scale the shape to bleed it out of the format, creating divisions inside the layout. This can be in outlines or solid filled.
